Remote Ready

PROFILE

Detail oriented Game QA Engineer with 4+ years of hands on experience across service based and product based gaming studios. Proven track record in functional, regression, compliance, exploratory, and LiveOps testing for PC, Console (PS4/PS5, Xbox One/Series), and mobile platforms. Experienced in defect lifecycle management, sprint based Agile workflows, and release validation, with added foundational knowledge in Python test automation. Known for thorough documentation, proactive process improvements, and bridging communication between development and QA teams.

EXPERIENCE

DECA Games

REMOTE

Jun 2025 to Present

Test Engineer

- Own end to end testing across live game products including features, content updates, events, builds, and hotfix releases prior to production deployment.
- Execute regression, smoke, sanity, and exploratory testing cycles for high frequency live releases, maintaining zero critical escapes.
- Log and prioritize defects in JIRA; collaborate directly with developers, producers, and designers to accelerate resolution.
- Validate backend configurations including in game economy, rewards, store items, seasonal events, and monetization features.
- Support LiveOps QA for time limited events and production rollouts, ensuring seamless player facing experiences.
- Participate in Agile ceremonies (sprint planning, standups, retrospectives) and maintain test cases, checklists, and release readiness docs.

SIDE (formerly PTW), Bengaluru

Apr 2022 to May 2025

Test Engineer (Jan 2023 to May 2025)

- Designed, created, and executed test plans and test cases for AAA game titles across PC, Xbox One, and PlayStation platforms.
- Conducted functionality, performance, and exploratory testing to surface game breaking bugs beyond predefined test cases.
- Assisted with multiple AAA title Xbox compliance submissions, ensuring all certification requirements were met successfully.
- Served as Point of Contact (POC) for select projects, coordinating between clients and internal QA teams, managing priorities, and communicating status updates.
- Improved bug tracking systems and contributed to test suite enhancements aligned with evolving project requirements.
- Conducted knowledge sharing sessions covering test case creation, bug reporting best practices, and test execution strategies.

Trainee Test Engineer (Apr 2022 to Dec 2022)

- Performed regression, functional, and compatibility testing for new game builds and patches across multiple devices and OS configurations.
- Documented defects with clear reproduction steps, screenshots, and logs to enable rapid developer triage.
- Participated in game playthroughs to validate gameplay consistency, UI/UX behavior, and interface functionality.

KEY HIGHLIGHTS

- In depth knowledge of Xbox compliance standards and certification requirements for AAA titles
- Served as Point of Contact (POC) coordinating client communications and team deliverables
- Proactive in identifying process gaps and improving QA methodologies and documentation
- Led internal knowledge sharing sessions on test case creation and bug reporting standards
- Experience across both service based (SIDE/PTW) and product based (DECA Games) studios
- Foundational Python automation skills, actively expanding into test automation tooling

EDUCATION

Bachelor of Engineering in Mechanical Engineering

2017 to 2021

Adhiyamaan College of Engineering

Hosur, Tamil Nadu

Higher Secondary Certificate (12th)

Sri Vijay Vidyalaya Higher Secondary School

April 2017

Krishnagiri, Tamil Nadu
